

STINGRAY

1991

The new "zp" series boasts a hull design that is nothing less than revolutionary. By increasing efficiency with a notched transom and specially designed strakes, the z-plane hull enjoys superior speeds and remarkable agility.

Stingray style is your style.

Ergonomics, the science of comfort, is coupled with 3-D design capabilities to give Stingray the advantage in luxury, functionality and style.

is built in the U.S. of high quality materials and components. All Models have: A full curved glass windshield with anodized aluminum frame; Stainless steel hull and deck hardware; power trim; integrated swim platform with stainless steel boarding ladder and grab rails; NMMA certification; hand laid fiberglass hull and deck; flotation foam; polypropylene seat cores (instead of wood); high density urethane seating foams; tough vinyl upholstery, without wrinkles or tucks to trap moisture and dirt; color fast accent striping; and high tech computer assistance from concept to completed product. Quality and value stand up to time and maintain Stingray's exceptionally high resale price.

Every surface and volume of a Stingray model has a useful purpose. Computer Aided Design (CAD) allows Stingray to

The boat you own is a signature of the finer things you enjoy in life. Stingray's timeless style and inherent beauty compels a second glance, while superb performance sometimes makes that second glance difficult. Whether this is your first boat or one of many, Stingray's goal is to keep boating your number one recreation.

Stingray builds superior sportboats, cruisers, and runabouts in a size to suit you.

The Stingray name says value. Every Stingray boat

From 17 to 28 feet,
Stingray provides a
wide variety of
models without
compromising quality.

All wood parts are cut using a computer controlled router, accurate to .001", guaranteeing quality down to the smallest detail in every Stingray produced.

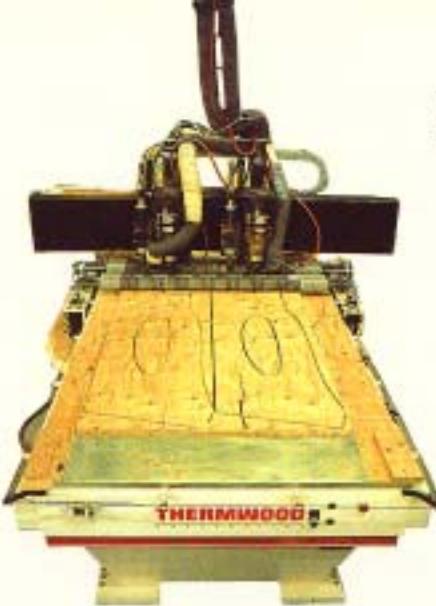

Include features in a boat and make the features conveniently usable. Within Stingray's design computers there are not only boats but people, computer people

with elbows, knees, eyes, and heads. Using this tool Stingray's designers can place people in the boat, making use of an intended feature, and tailor the boat around that person. Only then does the designer know there's ample headroom, controls can all be reached, gauges can be seen, etc. Stingray's designers know well before the model is ever built that if you can sit somewhere there's head room, and if you must reach something there's elbow room.

Evolution and revolution over countless hours of testing have produced the Z-Plane Hull. The patent pending ZP hull series has performed exceptionally well for our test team as well as several magazine test teams, so you can feel confident it will work for you.

"Starting with a clean computer screen, Stingray's engineering staff went to work blending the company's extensive performance know-how with some provocative new theories in V-bottom hull design. The result is one of the best running, most efficient 19 foot bowriders we've tested."

- Powerboat Magazine

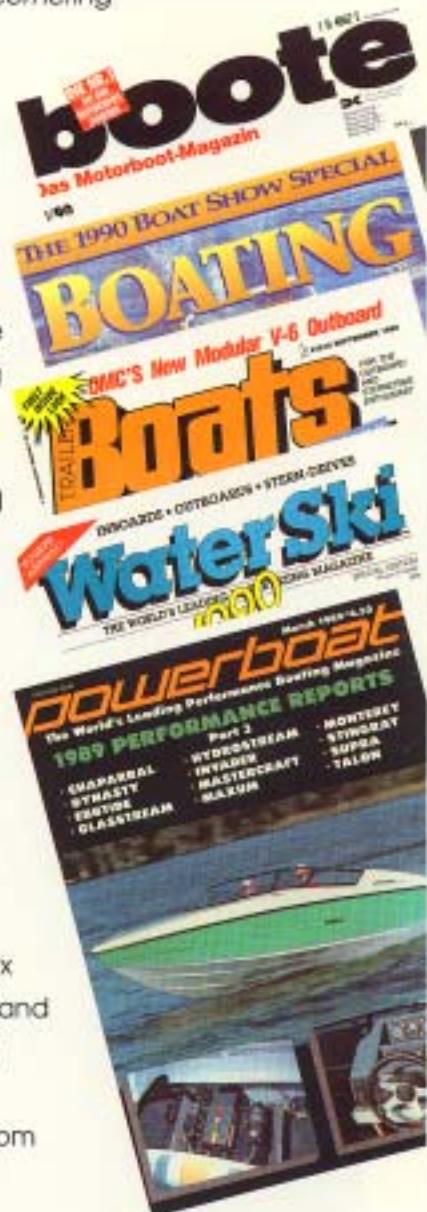

The ZP hull series has proven itself to be agile and efficient with an excellent "feel" that must be experienced.

"I could've spent the whole afternoon weaving my way across the lake - the cornering stability was that enticing."

- Bob Nordskog,
Powerboat Magazine

Stingray Boat Company is based in Hartsville, S.C., a small southern town where Stingray started producing boats in 1979. The plant is clean and efficient and employs most of its original employees to this day. Peerless use of modern robotic and computer technologies allows Stingray's boat builders more time to attend to detail and quality.

Beyond this page lie four innovative cruisers, five aggressive sportboats, six high-spirited runabouts, and a rock solid sportfish. All honored with Stingray's commitment to detail from design to delivery.

Welcome to the world of Stingray!

Regular features and performance awards in leading boating magazines testify to Stingray's superior standards of construction and performance.

536zp

537zp

"This recreational stern-drive [536zp] appropriately earns our Family Ski Boat Seal of Approval, and some of its performance statistics actually exceed the standards required for that range."

- Waterski Magazine

The 536zp and 537zp, pioneers of the 'zp' hull design, perfectly melds practicality, performance, and comfort. With the advent of computer design, every form and function has been meticulously engineered.

Waterski Magazine noted that the 536zp has an "exceptionally well-designed interior for a 17-and-a-half-foot bowrider." Standard interior includes a padded motorbox with built in drink holders, rear jump seats, a back to back sleeper lounge on the passenger side, and a swivel bucket seat at the helm. The optional interior offers two swivel bucket seats, a full width bench seat and a generous sunpad. Both interior arrangements are exceptionally deep and offer plenty of storage, an in floor skidlocker, top storage, and a 46 quart in-floor cooler.

All stainless steel hardware, integrated swim platform with boarding ladder, and a curved glass windshield couple with "zp" performance to easily separate these models from all contenders.

536zp

537zp

The 590 series (195') is an excellent combination of good size, great hull and beautiful interior layout. Its deep, wide cockpit feels very secure and the instrument panel is perfectly laid out in a non-glare enclosure. On-the-water performance holds to high standards of quality engineering. The transom is notched, as in offshore racing boats, allowing the engine to be mounted a bit higher. This creates less drag and higher speeds, without compromising cornering agility.

From the cleats to the rails, all hardware is stainless steel, installed with stainless steel screws into areas reinforced with glassed-in backing plates.

Bob Nordskog, editor of Powerboat Magazine, said, "I could've spent the whole afternoon weaving my way across the lake - the cornering stability was that enticing." Waterski Magazine agreed by pointing out that it produced a "smooth, quiet ride and excellent handling, especially around the dock".

596zp

597zp

"Stingray's engineering staff went to work blending the company's extensive performance know-how with some provocative new theories in V-bottom hull design. The result is one of the best running, most efficient 19 foot bowriders we've tested."

657zp

These models help make having friends on board a pleasure. The 656zp and 657zp offer the same performance advantages of the smaller "zp" models, with a maximum amount of space.

The open-bow 656 boasts a molded-in bow section with padded bow seating, bow side panels and ample storage. On the other hand, the 657zp has a spacious cabin that is accessible through a dash hatch that seconds as a step aloft.

Standard AM/FM cassette stereo, integrated swim platform and in-floor ice chest are guarantees for a successful outing - no matter what your water sport.

Ergonomics has been used for years in the automotive and furniture industry to determine proper proportions for maximum comfort. Stingray cockpits and interiors are fine examples of ergonomic layout and design allowing a high level of functional efficiency. All this combined with the revolutionary "zp" hull is sure to make your next excursion one to remember.

Using the same superior Z-Plane hulls as the runabouts and sportboats, Stingray has produced two cruisers with weekend amenities. The 599 (5.9m, 19'5") and the 659 (6.9m, 21'5") are smart, trailerable second homes.

The cockpit seating, whether standard or optional XL layout, is constructed of polypropylene cores - not wood - supporting high quality foams and vinyls. Stingray builds its seating to last as long as its hull.

The decks and hulls are built around an extremely space efficient interior of low maintenance fiberglass. The cabin will sit two 6'3" men comfortably while they cook at a full galley! A recessed alcohol stove with cutting board, a sink with three gallon water tank and formica countertop are all easily cleaned, and concealed until you need it. Rearrange the cushions and in a matter of seconds you have sleeping quarters for two.

599zp / 659 zp

"Stingray intentionally keeps the hull graphics simple and straightforward for a high class, elegant look."

- Powerboat Magazine

599zp

659zp

719zp

"Stingray believes in staying abreast of new developments and implementing that technology wherever it can."

- Powerboat Magazine

This 23'6" (7.1 meter) cruiser provides excellent performance with creature comforts of a much larger cruiser, all in a trailerable package.

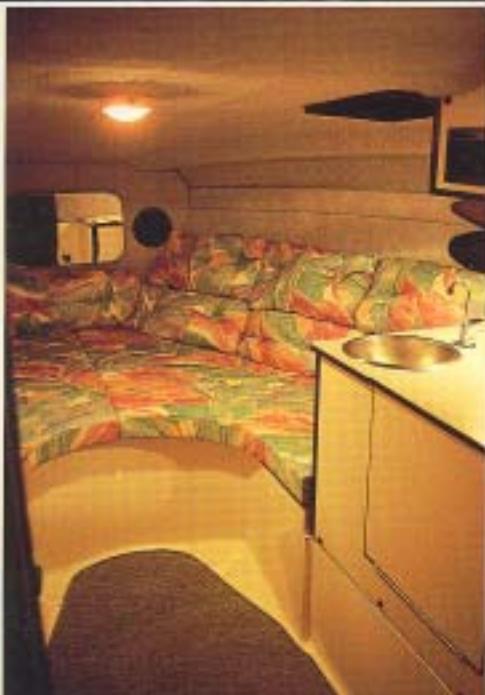

The walk around deck leads to bow anchor storage and a forward sun pad. A curved glass windshield and a low profile deck complement the lines of the z-plane hull. The cockpit sports two swivel bucket seats and a picnic table. A full width bench seat converts to a large double bed for lounging in the sun or comfortable overnight stays. The low-glare dash panel offers an unobstructed view of the gauges and provides an accessory panel for additional electronics.

Below, the cabin boasts a fully enclosed head with vanity, a galley, and dinette seating for four with plenty of headroom. Two hatches and four screened windows provide ventilation.

For weekend cruising or marina hopping, the 719 is ideal.

L.O.A. 7.1m (23'6")

Based on the same successful hull design as our sportboat, the 829 is a showcase of Stingray's attention to detail in design and construction. It's a trailerable second home with luxury features at an affordable price.

The 829svc is Stingray's largest cruiser in the 1991 lineup. The cockpit has a straight-forward layout that guarantees plenty of room. The helmseat can accommodate three and as many as five can sit comfortably on the L-settee aft. The walkthrough transom makes entertaining easy.

The cabin area is nothing less than ingenious. The layout accommodates a large dinette area that can convert to an extra-large double V-berth. A galley, with full standing headroom, is complete with stainless steel sink, two burner alcohol stove, with a cutting board cover, and refrigerator. A fully enclosed stand up head has a sink, vanity, and handheld shower. To finish it off, the aft cabin has a second double bed with sitting headroom.

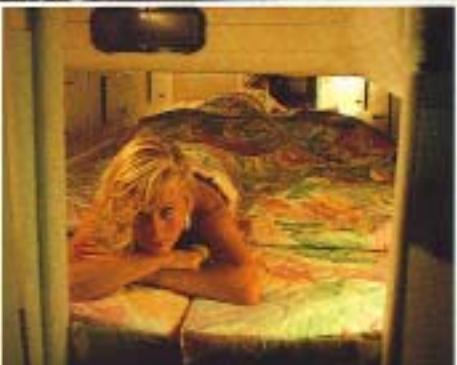

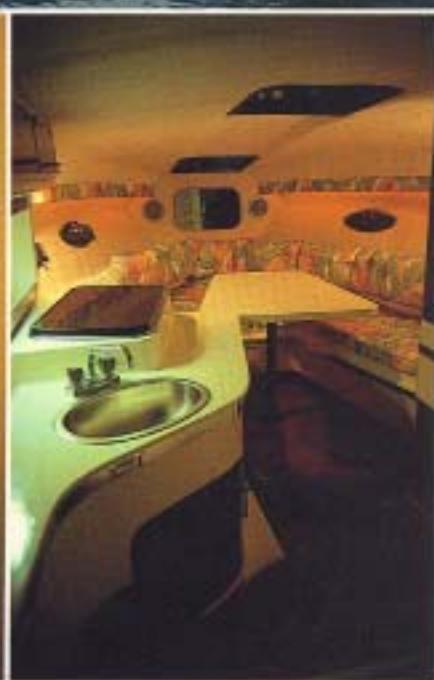

829svc

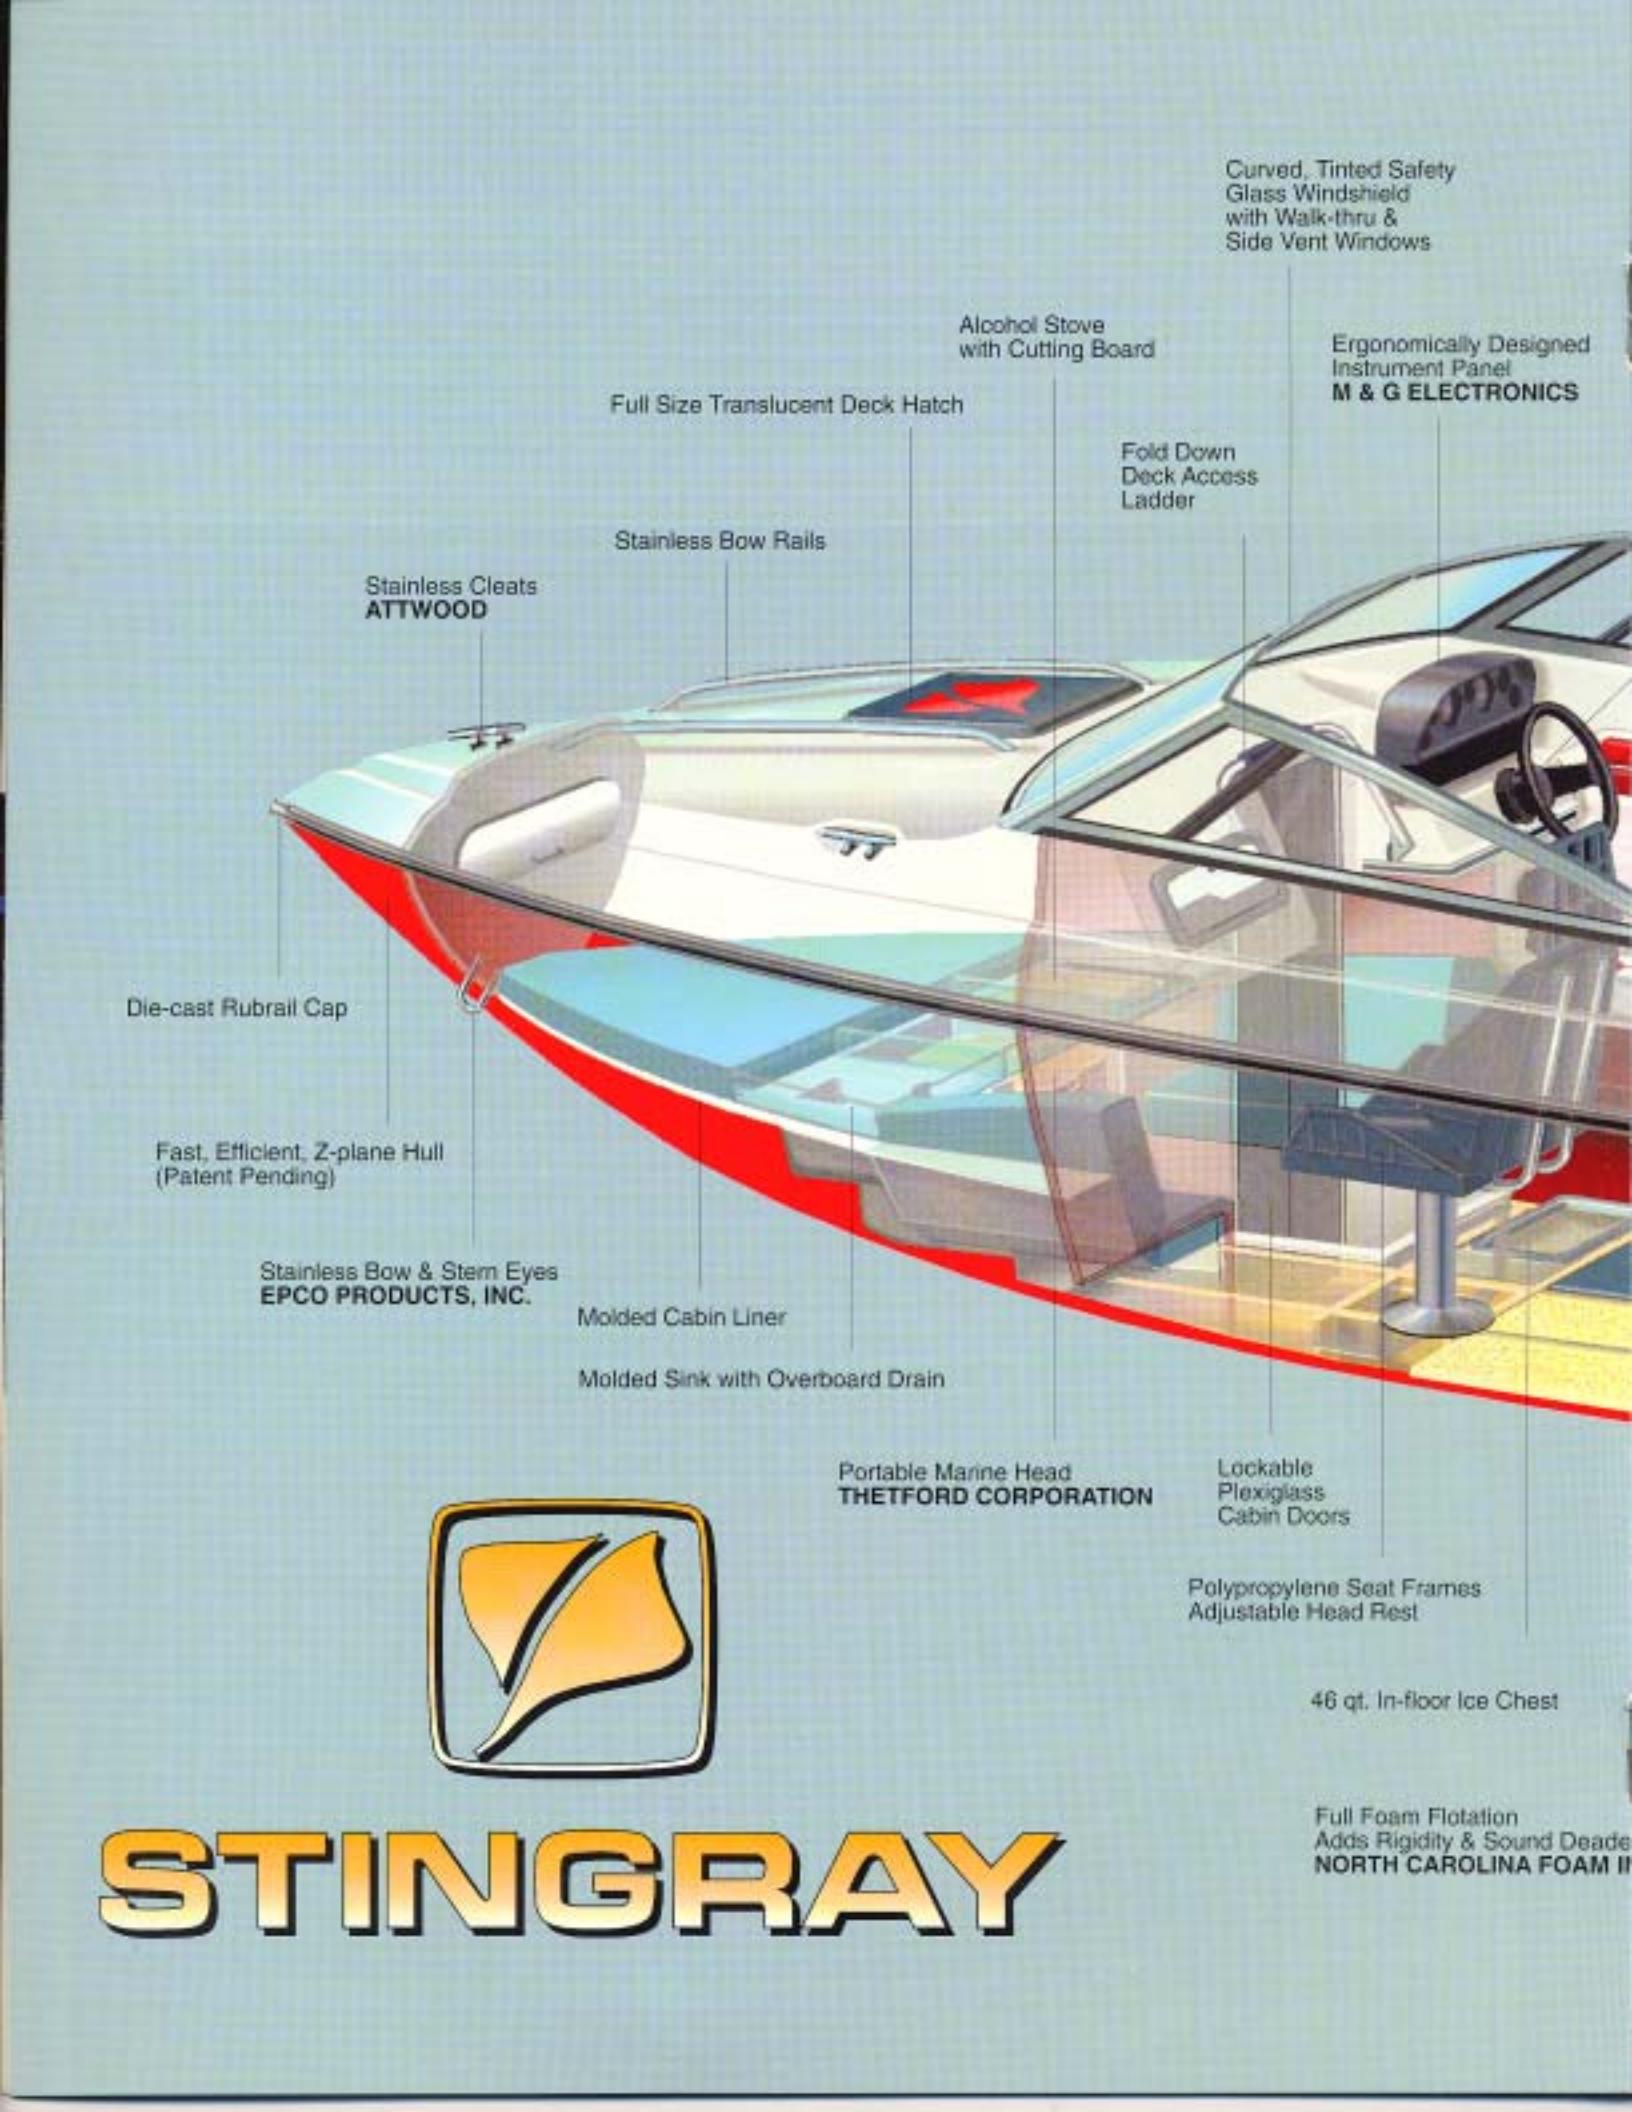

"Stingray already has a reputation for producing well-made boats that are good performers. But the new, sporty-looking Stingray 829svc is revolutionary in terms of an ingenious use of space which makes it an extremely versatile, all-around family cruiser."

268svf

"Had Stingray simply designed a center console, the boat would be just another fishing rig. Instead, what we have is a fully equipped, pocket-size sportfisherman with a large cuddy that leaves nothing to chance."

- Boating Magazine

Offshore fishing is a demanding and unpredictable sport. Your fishing vessel must be able to take all the demands that the open-sea, weather, and a large catch can dish out. The 268 is comfortable and secure whether it's a beautiful sunny day or a wild "I'm only out because it's a tournament" day.

Built from the same hull as Stingray's offshore sportboat, the 268 has the substance to smooth out the lumps. With twin 200's, speeds hover at 60 MPH while the ride remains dry and smooth. For fishing, cruising, or diving, the 268 is a low maintenance high performance work and pleasure boat. A padded leaning post, circular 25-gallon livewell, walk through transom, and enough rod storage for 28 rods add the right practical touches.

Below the foredeck in the cabin area is a generous 47" headroom. A two burner alcohol stove, fiberglass sink, table, and Porta-potti are standard in the cabin that can be converted into either a sitting area or a pair of 6 1/2' V-berths.

L.O.A. 8.8m (29')

For 1991, Stingray proudly introduces the 598zp and 658zp sportboats. Based on the proven performance of the z-plane hull, these two models integrate top of the line features and components with timeless styling.

Top to bottom these boats have looks that move. A long shapely deck blended with low raked curved glass windshield demands a second glance. Bow and stern lifting eyes compliment the all stainless deck and hull hardware. The "zp" hull not only handles exceptionally well, but also has a clean, fluid look from any angle.

A closer look reveals standard swivel bucket seats, full width bench seat, sunpad, VDO Blueline gauges, and an adjustable Dino steering wheel. Beneath the foredeck lies a large cushioned v-berth for an afternoon snooze or an occasional overnight.

The 598 and 658 sportboats - shaped to leave the wind and water unstirred and a lasting impression on your mind.

598zp / 658zp

"Stingray places a high premium on attention to detail, a superior finish, and the production of boats with performance characteristics that exceed others in their class."

- Waterski Magazine

658zp

598zp

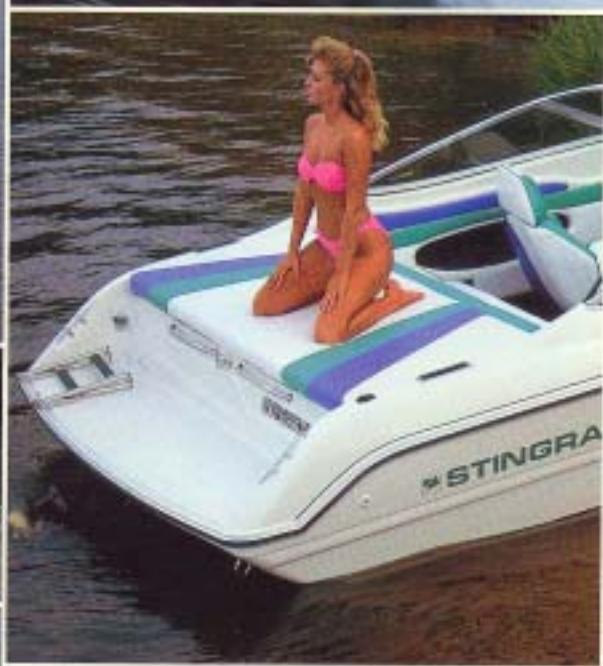

598zp L.O.A.

18' 11" (5.67)

658zp L.O.A.

21' 11" (6.63)

696svx / 698svx

"The boats tracking, handling and turning characteristics were all exceptional. We found absolutely no peculiarities, which means to us that the 698 is a pleasure boat in the truest sense."

- Powerboat Magazine

Sixty mile per hour speed in a bow rider demanded a second look at seat design. Hence the 696 bow rider's contoured bow seats for secure, comfortable high speed cruises. The 698 shares the 696's hull, cockpit, and low raked windshield yet adds a lockable cabin embracing a huge v-berth and concealed head.

The standard cockpit is an XL layout with two swivel bucket seats, a full width bench seat, a large sundeck and a 48 quart in floor cooler. The highlight of the cockpit is the dash, with a full compliment of oversized VDO Blueline gauges and a tilting Dino steering wheel. The matching unit on the passenger side contains a large lockable glovebox and grab rail.

The 690 series hull is built for speed. Its deep V hull with three sets of lifting strakes provides high controllable speeds, super cornering ability, and a smooth ride in all conditions. With as much as 365 horsepower, speeds will easily be in the high-60's.

Grab your friends and take them for the ride of their lives!

698svx

696svx L.O.A. 6.9m (22'8")
698svx L.O.A. 6.9m (22'8")

696svx

The 828 is Stingray's 1991 flagship. It embodies everything Stingray stands for: eye-watering speed, superb handling, a space efficient cabin, and distinctive Stingray styling. The 828 has excellent performance rigged as a single 454 c.i. package or mid-seventy MPH package with twin 454s. In either case the boat's balance allows a perfect running attitude and dazzling handling. All testifying to the extensive fine-tuning that has gone into making this offshore legend.

The cabin was designed with entertaining in mind. As you pass through the smoked plexiglass door you immediately notice two facing sofas that can fold together to make a 6'2" bed. An entertainment center with a stainless steel sink, wet bar, 25 qt. cooler, digital AM/FM cassette stereo, and concealed portable head divides the sitting area from a 7' berth. Powerboat Magazine exclaimed that Stingray was "willing to try some new ideas in cabin design, lighting and interior appointments and its paid off with one of the best laid out sport boats we've ever seen at this length".

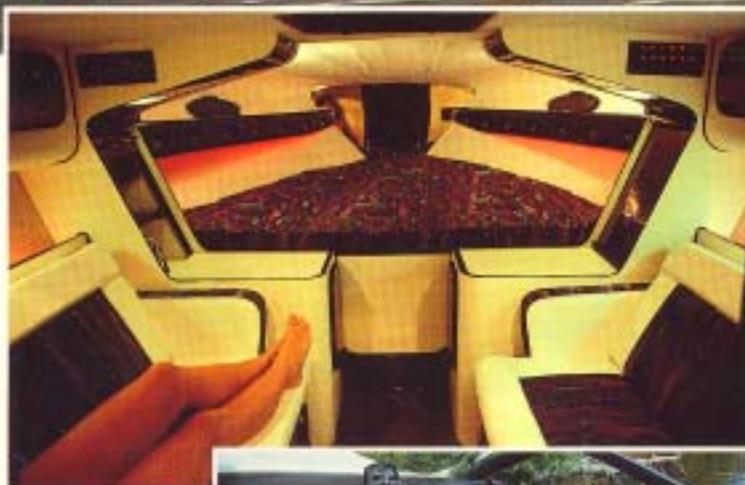

828svx

"Stingray President Al Fink put his heart and soul into this boat and has every reason to be proud. It is a masterful machine that does everything right."

Specifications are subject to change at any time without notice or obligation.
To avoid disappointment at the time of purchase please check with your Stingray Dealer for current information and specifications.
Boat speeds are averages of several tests and were performed with MerCruiser Sterndrive Power at sea level. All boat speeds and propellers shown are to be used as guidelines only for general applications as boats and operating conditions will vary. The best propeller for specific boating needs can only be determined by performance testing by your dealer. Results on individual boats may vary depending on many factors, including driver, weather, altitude, load, condition of propeller, lower unit, and boat bottom. Matching of your boat and use conditions to the proper propeller by your dealer will make your boating experience more enjoyable and keep your engine running longer and stronger.
Propellers used during testing are shown to be used as a guideline only and are not intended to be an absolute recommendation.

CAUTION: Never exceed engine manufacturers recommended RPM.

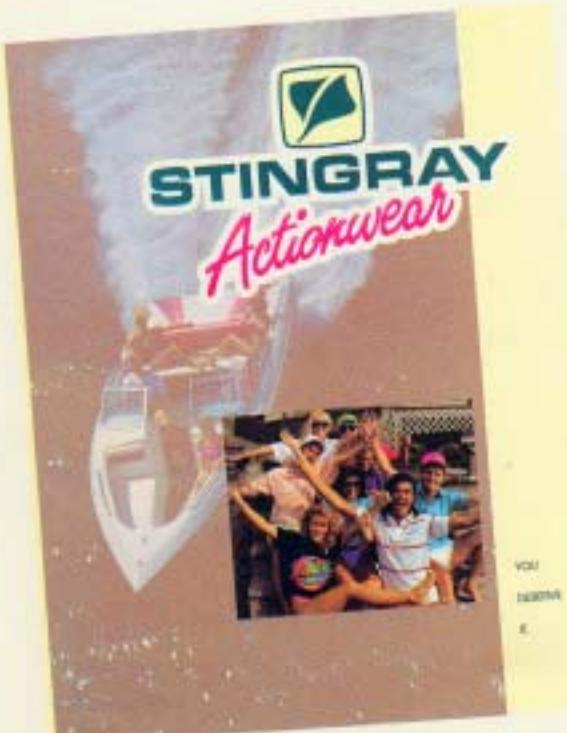

Actionwear

Designed especially for the Stingray enthusiasts, the 1991 line of Actionwear offers apparel and accessories that are sure attention getters. Whether boating or at any activity, Stingray Actionwear will add both color and style.
