Stingray - The Company

Not far from where interstates 95 and 20 come together, lies a company that in just a few short years has emerged as one of the leading independent boat builders in the nation. That company is Stingray Powerboats.

With over 225,000 square feet of manufacturing facilities located on 46 acres, Stingray is one of the most technologically advanced facilities in the country. Our state-of-the-art robotic driven production is responsible for award winning designs and quality that is literally "engineered-in".

Stingray was founded in 1979 by Al Fink. With two molds, a handful of skilled craftsman and a passion for excellence, Al set out to produce the best performing powerboats found in the industry. Today Stingray's product line consists of over 21 models and has a proven reputation for unsurpassed quality, performance and value. Al's foray into boatbuilding represents one of the longest continual ownerships in the industry - a milestone that not many manufacturers can boast of, particularly in this day and age of "downsizing, buyouts and corporate mergers".

Stingray is family oriented. The Fink Family understands boating. Not only do Al, Debbie, Todd, and Chad devote their talents and resources to the business, they are avid boaters themselves. They understand the family boating lifestyle and consumer wants and needs. When you become a Stingray owner you join a larger family that consists of highly skilled employees, professional and competent dealers (with locations across the country), and many other proud Stingray owners.

Stingray has the right combination of products from value priced runabouts to sleek 70+ mph sportboats. We even offer a fully featured deckboat and a 24 foot cruiser for the "party-goers" in the crowd. Let one of our authorized Stingray dealers place you in the boat of your dreams!

The Stingray Difference

You don't get to be an award winning company without a strong commitment to excellence. We believe that quality and excellence must be built into the product, not tacked on afterwards. Many times it's the things you never see that separate "good enough" from "excellent". Just so you'll know, we've taken this opportunity to go over some of the finer points of your Stingray's construction details

cy and top speed. Also, the drain plug fastens in solid fiberglass, preventing water seepage into the transom core.

Teleflex® Gauges

Some manufacturers use a modular gauge panel that can make for some expensive repairs. Your Stingray gauges can be accessed individually for easy servicing. Gauges include fuel level, water temperature and trim gauges, voltmeter, speedometer, and tach.

Polypropylene Seat Bases

Our bucket seats and lounge seats are constructed of injection molded polypropylene cores instead of wood. Molded foam inserts are covered with 32 oz. UV-stable vinyls that have incredible puncture resistance and a thicker skin than most.

Curved Safety Glass Windshields

Our stylish windshields offer good looks and excellent visibility.

Stainless Steel Hardware

For strength and durability, Stingray uses high-grade stainless steel hardware mounted with custom-cut rubber gaskets and glassed in backing plates.

Five Year Protection Plan

Stingray backs every model it produces with a 5 Year Protection Plan. See your dealer for details.

Power Trim

Power trim comes standard on all MerCruiser and Volvo powered stern drives.

Lamination

Stingray's thorough lamination process combines robotics and skilled craftsmanship. Starting with precision molds, our quality construction consists of top quality materials including hand laid 24 oz. woven roving with Klegecel® and Coremat® cores, for a high strength to weight ratio.

Anchor Locker

This anchor storage locker in the bow holds the anchor and rope in a convenient location for quick and easy access.

Patented Z-Plane Hull

Stingray's patented zp hull is truly in a class by itself. After 10 years on the market, it's still up to 30% more efficient than the competition. (Translation: It costs less to operate.)

Notched Transom

The zp-hull has a racing style notched transom, allowing the engine to be mounted higher for less drag, enhanced fuel efficiency.

Fiberglass Cabin Liner

Our closed bow models feature this space efficient, molded fiberglass liner. Most models include a porta-potti, recessed alcohol stove with cutting board, a sink with a 10 quart water tank, and King Starboard® counter tops which are easily cleaned and concealed until you need them. Comfortable seating for two adults quickly converts to sleeping for two.

Generous Storage

Aboard every Stingray you'll discover ample storage space in the bow, side-panels, glove box and in-floor ski storage. XL interiors offer additional space under the benchseat and on both sides of the engine, giving you a noticeable increase in storage and maintenance elbow room.

Fiberglass Stringer Systems

All fiberglass, foam-filled stringer system will never rot; includes steel motor mount inserts with rubber insulators. (Fiberglass stringer available on most models.)

Vibration Dampening Motor Mounts

Special rubber insulators help to isolate engine vibrations for a smoother, quieter ride.

XL10™ Treated Wood

All wood parts in your Stingray are cut from Greenwood XL10™ Marine plywood panels. The panels are impregnated with oxide formulated preservatives, and carry a limited lifetime warranty against fungal decay/rot, termites and other wood eating insects, and manufacturing defects.

Lounge Seats

To maximize your comfort aboard, our polypropylene cored lounge seats have three positions for relaxing and sunning, plus fore and aft adjustment, with storage inside.

Stainless Steel Boarding Ladder

A deep two step or three-step telescoping boarding ladder makes getting in and out of the water easy.

Fiberglass Bow Cover

This fiberglass bow cover allows you to extend your boating season comfortably into the cooler months and is easily installed and removed.

Bow Access Step
Cuddy models with walk-thru windshields include a convenient bow access step that swings away when not in use.

Hi-Low Jump Seats
This clever feature allows you a variety of uses for the same interior. It quickly converts from jump seats to a full width sundeck. (Available in LS and CS models.)

Full-width Integrated Swim Platform
For safety and convenience, the swim platform has a non-skid surface.

Fiberglass Cockpit Liner
On many models we offer this low-maintenance fiberglass cockpit liner with a nonskid surface.

Contoured Bow Seats
Our unique contoured bow seat incorporates safety features while adding to your comfort.

Sportswear & Accessories
Hats, shirts, jackets, and visors are only a few of the extras offered by Stingray to make your boating experience even more fulfilling. For more information see page 30.

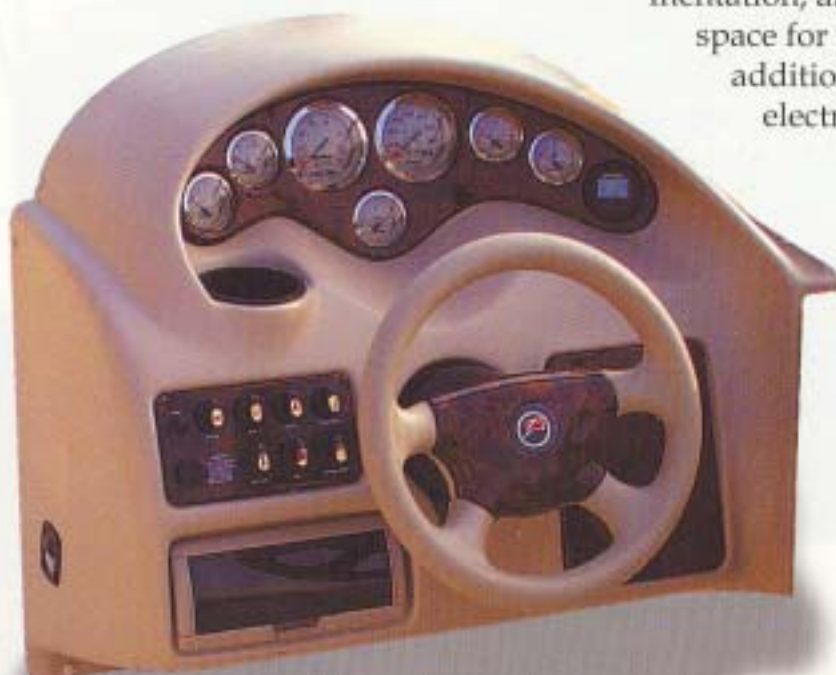

Premium Sound System
Stingrays are equipped with premium quality digital AM/FM stereo sound systems with waterproof dual cone 60-watt speakers. The protective enclosure offers additional isolation from the elements.

UV-Stable 20 oz. Carpet
We use a single seamless covering of 20 oz. UV-stable marine carpet on the floor and hull sides, as well as inside the ski locker.

Shrink-wrapped for Shipping
Every new Stingray is shrinkwrapped at the factory to provide added protection from the elements during shipping.

Dashes designed with electronics in mind.
On the 220ds, 240ls, and 240cs models, you'll find a custom designed dash with tilt steering, full instrumentation, and space for your additional electronics.

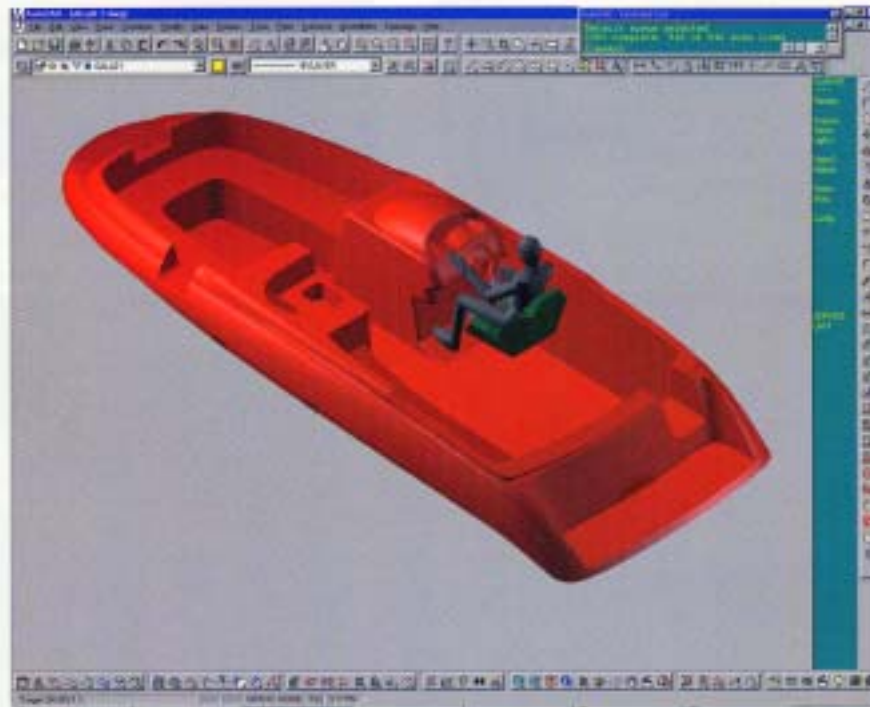

Stingray Technology

Few boat companies, if any, can match Stingray's commitment to advancing technology. Using tools that were unavailable just a few years ago, Stingray Boats are built with unequalled precision and efficiency. Having these tools in-house gives Stingray the benefit of pushing the technological edge even further.

COMPUTER AIDED DESIGN and MANUFACTURING

We spend a great deal of time working out the details of your new Stingray with a computer model before we commit the design to fiberglass. Major components are "assembled" on screen where we study various parameters and make any necessary adjustments. This computer model contains the information required for the next step in the process: 3-D milling.

MULTI-AXIS 3-D MILLING MACHINE

Stingray was the first boat company to install multi-axis milling machines in-house for tooling production. We now have two -

one 3-axis and one 5-axis. With information available from the 3-D computer model, the milling machines can produce a full size

model in a matter of hours - a task that would take weeks to complete otherwise. Additionally, we work with a "mirror image" of the computer model, which simply means that the running surface is as perfect as it can be. Our master craftsmen then provide the mirror finish that is a hallmark of Stingray quality.

CNC ROUTER

Stingray uses CNC routers to transform various sheet goods into high quality parts. Cutting irregular shapes can be a real challenge. The computer helps us to "nest" a group of parts efficiently to minimize waste. Not only are

these parts dimensionally identical from one run to the next, but they are finished in a fraction of the time and at less cost than those produced by hand.

ROBOTIC LAMINATION FACILITY

Visitors to our plant are always impressed by its cleanliness and unique manufacturing systems. In our lamination building, a custom designed overhead tram system was specially developed just for Stingray. Parts under construction are moved about the plant

under computer control. This system keeps track of our in-process fiberglass parts while optimizing mold usage and improving productivity. Process automation also increases worker safety, helps maximize efficiency, and improves quality.

WATER JET CUTTING MACHINES

Many parts on a Stingray are cut out using one of our high-pressure water jet machines. A stream of water no thicker than a human hair slices quickly and neatly through a

variety of materials much easier than could be done by hand. Materials such as carpet, foam, vinyl, canvas, rubber, and fiberglass are quickly transformed into high quality parts.

Stingray & the Environment

Throughout its history, Stingray Powerboats has “marched to the beat of a different drum”! While other manufacturers have relied on conventional methods and the technology of the day, Stingray has always searched for the unconventional ... with a look toward tomorrow. This has been true as evidenced by our many “firsts” in the industry such as our patented zp-hull, our state of the art robotic-driven production facility, and our comprehensive web site.

As we prepare to enter the new millennium, that same “drum” has led us to focus on the development of environmentally friendly products and advanced technologies that lead to lower per boat emissions, greater fuel efficiency and reduced waste ... all of which add up to a cleaner environment.

Being a leader in environmental technology is more than just a philosophy – it’s a commitment designed to help ensure the preservation of our natural resources for generations to come. Production initiatives are

already underway making all of our 1999 models even more ozone friendly. These initiatives, although costing Stingray more, are our way of building products that help to protect our fragile ecosystem.

Stingray is the only U.S. boat manufacturer to use new low styrene laminating resins and gelcoats in all its 1999 products. The combination of these low VOC materials coupled with the lat-

est in low pressure, high temperature spray equipment has reduced Stingray's VOC stack emissions per boat by more than 30%.

Every new 1999 Stingray is equipped with a fuel vent surge protector – a simple solution to venting fuel tanks without spillage. This innovation helps avoid refueling spills which contaminate our lakes and rivers.

Stingray uses 4-cycle engines for power, which can be four to ten times cleaner than 2-cycle outboards, not to mention being more fuel efficient. Better fuel efficiency translates into less fuel consumption but more importantly, less carbon dioxide emis-

sion.

Stingray is committed to an aggressive recycling program. Waste materials such as cardboard, composites, foam, stainless steel, plastics, aluminum, pallets and metal

drums never find their way to the landfill.

Instead they are recycled for re-use.

Last year Stingray recycled over

100,000 pounds of cardboard alone!

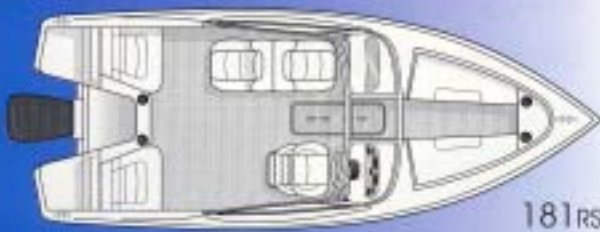

The preservation of landfill space is just another example of Stingray's commitment to energy conservation and waste reduction.

* Available with Bravo III Drive

Specifications are subject to change at any time without notice or obligation. To avoid disappointment at the time of purchase please check with your Stingray Dealer for current information and specifications.

Performance data comes from factory testing, independent engine manufacturers testing or independent magazine testing. All boat speeds and propellers shown are to be used as guidelines only for general applications as boats and operating conditions will vary. The best propeller for specific boating needs can only be determined by performance testing by your dealer. Results on individual boats may vary depending on many factors, including driver, weather, altitude, load, condition of propeller, lower unit, and boat bottom. Matching of your boat and use conditions to the proper propeller by your dealer will make your boating experience more enjoyable and keep your engine running longer and stronger. Propellers used during testing are shown to be used as a guideline only and are not intended to be an absolute recommendation.

CAUTION: Never exceed engine manufacturers recommended RPM.

PROPELLER KEY (For use as a guideline only)

Pitch/Material	Part Number	Pitch/Material	Part Number
G 17" Aluminum	48-832828A45	N 21" SS Mirage	48-13702A41

*WARRANTY INFORMATION

All Stingray warranties are limited warranties within the meaning of title 1 of the Federal Trade Commission Improvement Act. A full statement of coverage, terms and conditions applying to the Stingray warranty has been furnished to all Stingray Dealers. In addition, information is supplied with each new Stingray Boat.

Please read carefully the terms and conditions provided in Stingray's Express Limited Warranty accompanying the sale of your boat. The actual length of warranty coverage for your boat may vary depending on the date of original manufacture and the date of sale of your boat.

This brochure shows only a partial list of standard equipment and some boats are shown with optional accessories. To avoid disappointment, please check with your Stingray dealer for current information and specifications at time of purchase. Any variations in colors shown are due to reproduction variations in the printing process. Styling, design, equipment, prices, colors, and construction are subject to change without notice or obligation.
